Mile2's C)PTE vs. CEH®

WHY IS MILE2'S C)PTE PREFERABLE OVER THE EC Councils CEH?

It's noteworthy to bring to light that mile2 was the first to bring the CEH into North America and different parts of Asia. Realizing that the CEH product was technically insufficient, mile2 developed our own certification based around industry standards and technical requirements need to competently execute penetration tests.

HOW IS MILE2'S C)PTE SIMILAR TO CEH?

- Both courses provide an in-depth presentation on both tools and industry known vulnerabilities.
- Both courses have very similar questions you would find on either exam.
- Both courses are internationally recognized.

HOW IS MILE2'S C)PTE DIFFERENT FROM CEH?

- THE C)PTE is ***focused*** on ***hands-on labs*** vs. **CEH's hundreds** of **outdated tools** & **power point slides.**
- Mile2's C)PTE focuses on penetration testing, not outdated "hacking" methods that aren't accepted with financial and government institutions world wide.
- Mile2's curriculum was originally developed according to the U.S. Air Forces penetration testing methodology.
- The C)PTE's exam is taken **online through mile2's MACS** exam system **ANYTIME & ANYWHERE** verses CEH's physical testing center. The C)PTE is an open book, 2-hour exam covering 100 questions.
- The C)PTE labs are experienced on mile2's world renown cyber range!
- The C)PTE's exam fee is $400 versus the CEH's $600, which includes a $100 application fee!
- Mile2's C)PTE is a progressively popular certification while the CEH's exams have globally declined.
- Mile2 is accredited with the NSA-CNSS (CNSSI-4013 National Information Assurance Training Standard for System Administrators) and is on FBI's Tier 1 cyber security training requirement.

HOW DOES MILE2 HELP WITH PASSING BOTH THE C)PTE AND CEH?

Mile2 provides an updated CEH exam prep **video** & **workbook** for each student that takes the C)PTE course.
